

Objekt: ENSV Rakvere linna ja rajooni uurimis-projekteerimistööd

Sifr. nr.: III-79032

Tellija: Rakvere Raj. RSN TK PV Sotsiaal-kultuuriliste ja kommunaal-objektide ehituse osakond

Teostaja: _____

ENSV Rakvere linna ja rajooni
uurimis-projekteerimistööd

Rakvere, Pika tänava hoonete fassaadide
värvikavand

Kõide IV - värvikavandid II etapp

Direktor _____

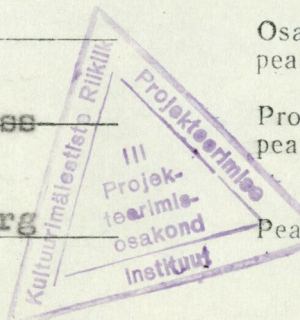

Osakonna peaarhitekt A. Kann

Peainsener H. Toss

Projekti peainsener J. Treikelder

Osakonna juhataja A. Sandberg

Peaspetsialist _____

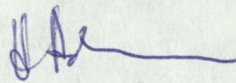

Tallinn 1980

Projekti koosseis:

- Köide I Ajalooline ülevaade
- Köide II Värvisondaažid
- Köide III Värvikavandid. Paaritud numbrid
- Köide IV Värvikavandid. Paarisnumbrid

Köite IV (paarisnumbrid) koostasid:

Grupijuht, arhitekt

H. Adrikorn

Arhitekt

M. Tammoja

Arhitekt

A. Vaarpuu

Seletuskiri

Rakvere vanalinna korrastamise ja regenereerimise üheks etapks on majade värvikaartide koostamine. Värvikaardi koostamise aluseks on Kultuurimälestiste RPI-s 1979.a. teostatud töö nr.III-79032/4 köide II, värvisondaažid. Samuti on aluseks Rakvere Rajooni RSN TK PV Sotsiaalkultuuriliste ja kommunaalobjektide ehituse osakonna tellimiskiri.

Kogu töö on jagatud kahte etappi:

I etapp - paaritud numbrid, Pikk tn.1-63

II etapp - paaris numbrid, Pikk tn.2-80.

Käesolevas etapis on lahendatud värvitoonide valik paarisnumbritega hoonetele. Samas on tehtud ettepanek akende jaotuse, katuse kattematerjali muutmise kohta. Katused kaldega 30° ja enam on kaetud punase S-kiviga, laugemad katused - plekiga, mis värvitakse. Vahetult kapitaalremondist tulnud majadel säilitatakse olemasolev katuse katõ.

Kardinaal~~se~~^{ne} fassaadi muutmise ettepanek on hoonele Pikk tn.28. Samuti varasemate kapitaalremontide käigus püstitatud silikaattellistest tulemüüride lammutamine.

Hoonele Pikk tn.2-1 pole värvitoonide kaarti antud, kuna see on väljastatud varem eritingimustes (KRPI arhiiv P-2341).

Puithoonete, -detailide ja konstruktsiooniosade värvimiseks kasutada ilmastikukindlaid õlivärve. Kivihoone-

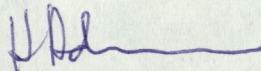

te värvimiseks kasutada lubivärve või võimaluse korral "Kenitex" värve.

Enne värvimisele asumist tuleb taastada või välja vahetada kõik purunenud ning amortiseerunud fassaadide dekoorielemendid (profiilid, karniisid, akende-uste piirdelauad, krohviraamistused jne.) olemasolevate või säilinud osade järgi. Sama nõue kehtib ka räästarennide, vihmaveetorude, lipuhoidjate, numbrisiltide ning akna ja uste suluste, tuulelippude kohta.

Enne viimistlustööde alustamist tuleb värvitavad pinnad hoolikalt puhastada vanadest värvikihtidest, irdunud krohvipinnad tuleb uuendada.

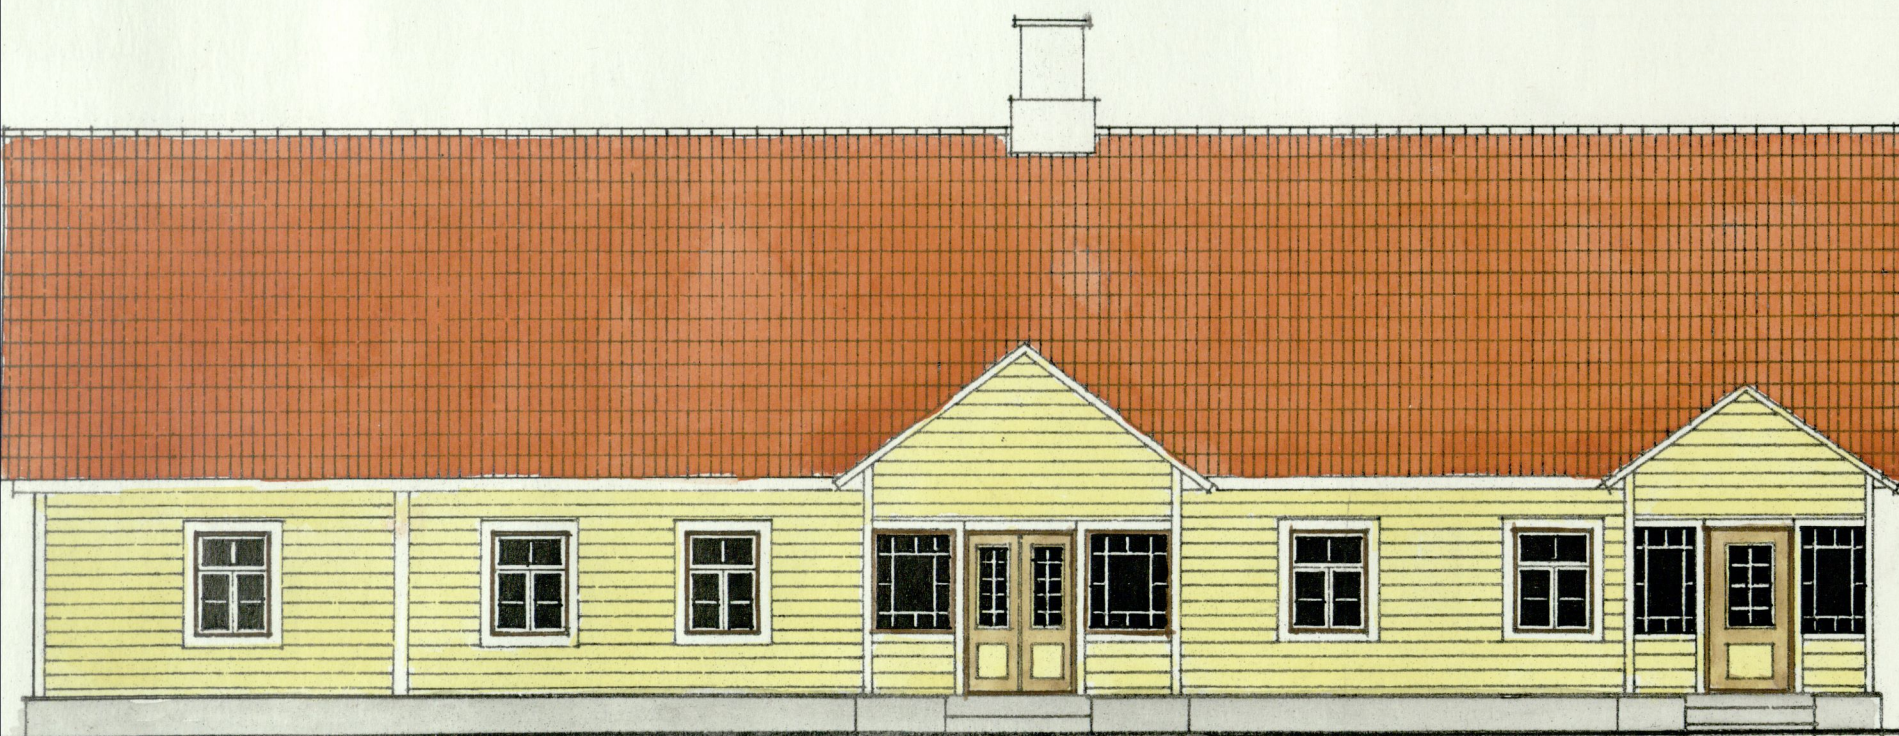

Vihmaveetorud ning räästarennid värvitakse hoone põhitoonis.

Kuna värvikaart on koostatud üldises laadis, siis detailide värvimisel on tarvilik konsulteerida koostajaga (arh. Adrikorn, Henno, Kultuurimälestiste RPI III osakond, tel. 605-496, Estonia pst.7).
